

SAVE ON YOUR SPECIALTY MEDICATIONS

We're working with HelpScript®, an independent company, to lower your costs for certain medications to as little as \$0. This cost-share assistance service offers savings on more than 200 injectable and infusion specialty medications that are administered by a health care provider.

HERE'S HOW IT WORKS

Getting started is easy, and the service is included in your health plan so there's no additional cost to you.

HelpScript helps you enroll

If you qualify, a Patient Member Advocate will call you to explain the service, review your medications, and help get you signed up.

You receive your medication

Have your eligible specialty medication administered as you normally would. HelpScript will check for available manufacturer savings.

Your savings are applied automatically

Once enrolled, you don't need to do anything to save. Copay assistance is automatically applied before your claim is processed.

FREQUENTLY ASKED QUESTIONS ABOUT THE COST-SHARE ASSISTANCE SERVICE

How does HelpScript work?

Some medication manufacturers offer financial assistance to help cover some or all of the out-of-pocket costs for their medications. The service identifies these savings and, once you're enrolled, automatically applies them to your claim when you receive an eligible medication.

How do I enroll?

If you recently received an eligible medication, one of HelpScript's Patient Advocates will call you to explain the service and help you enroll. Or, to enroll today, you can call HelpScript directly at **1-833-813-8236**.

I'm already using manufacturer's assistance for my medication. Do I still need to enroll?

If you're currently using another manufacturer copay assistance program, call HelpScript at the number above to discuss your options. They can help you choose the best fit for your needs.

What happens if I don't enroll?

If you choose not to enroll, we won't be able to apply the savings to your medication costs. You'll be responsible for paying for the medication according to your plan benefits.

What medications are eligible?

More than 200 specialty medications that are covered under your medical benefit are eligible for this program. These medications, which must be injected or infused by a provider in a medical setting, include certain medications for psoriasis, cancer treatment, diabetic retinopathy, asthma, and more.

How does the service affect my plan's deductible and out-of-pocket maximum?

Once you're enrolled, any costs covered by the service for your medication won't apply to your deductible or out-of-pocket maximum. Any remaining costs or other charges, such as a copay for an office visit, may apply, according to your plan benefits.

Who do I call with questions about the service?

You can call the HelpScript Care Team at **1-833-813-8236**, Monday through Friday, 8:00 a.m. to 8:00 p.m. ET.
